Me-o-my,

how you'll take to a pipe—and P. A.!

Before you're a day older you want to let the idea slip under your hat that this is the open season to start something with a joy'us jimmy pipe-and some Prince Albert!

Because, a pipe packed with Prince Albert satisfies a man as he was never satisfied before—and keeps him satisfied! And, you can prove it1 Why-P. A.'s flavor and fragrance and coolness and its freedom

from bite anil parch (cut out by our exclusive patented process) are a revelation to the man who never could get acquainted with a pipe! P. A. has maile a pipe a thing of joy to four men where one was smoked before!

Ever roll up a cigarette with Prince Albert? Man, man-but you've got a party coming your wayl Talk about a cigarette smoke; we tell you it's a peach!

SWISS CHARD GROWN MAINLY FOR GREENS

Soil Should Be Rich and Thoroughly Prepared.

When Young Plante Are Nicely Started They Should Se Thinned Out -Luculius is Considered the Bast Variaty.

Proposed by the tinited States Depart-

ment of Agriculture i Chard usually spoken of as Swiss cherd, le a form of beet with fleshy leaf stems grown mutuit for use as greens during early summer and fall The seeds resemble those of the comtions parden beet and are planted in exactly the same number The soil on which chard is planted should be well enriched and thoroughly pre-

plays will be a feature of her program. Swiss Chard, a Best Which Has Been Bred for Betad Fattage Instead of

pared, say garden specialists of the I utted States Department of Agricul ture I and the seeds in runs 15 it lies to 2 feet apart and lil to 12 areds to the foot to maure a fell stant The seeds aboutd be covered about I in h deep, and the autface slightly jacked aith the bank of the hoe after the seeds are covered.

When the young plants ere uteely started they should be thinned to stand eliout 4 or 5 luckes apart to the rew I velve Wree a I W a Pare The plants thinned out are commonly more the leaf stems leading the rolls end hearts of the plants to preserve Ptole James and wife and Murrel more leaf stems. The thit k leaf stems are conked the same as other greens The veriety of clard he we as for ut ed as a butder along the garden

PLAN TO SMOTHER BINDWEED

Alfalfa le One of Boot Means of Contrelling Wild Meining Glery-Other Crops Useful.

am thering effect and frequent cetting p im t wa da feet r da head and it receives is one of the heat all-around "den ity a ake y it shirt off. Hef y a means of controlling bindweed (wild not can shake here off you dence morning glory) in sections where prests been alfalfa gruns well, United States Department of Agriculture especia is its dat date of guite ser men b find l'owpens a rebum, milet, sor as emotivering crops but are rarely mic een run lectic way and step Mr. I la lin a f tut is was the as spreading on offaifa it is well queers to follow alfalfa with a clean co tiseted

Hoga are fond of both the under Mrs heims la i ha ret med ground and above ground growth of hely in a aba eggs to mon he ees bin iweed If the land is ploused it will greatly assist the high to removing the underground parts. Sheep pasturing has been found helpful but lidee, I dunne It is not as useful a method as hog pastering lirestny helps to hold bind weed in check but can at be depended upon tu secure erad uiton.

The use of chemicals other than sait has not been sur-orful as opt under special conditions and is not recommer led t'are should be exercised in present the introduction of the pent by menns of 11) impure west especially impure wheat seed, (at manurebit in each seed may be contained in Till in chandred from of cup now the droppings or may enter manure. Tuesd well as a prin or a lest the droppings or may onter manure by the oillition of besiding contain . ing histinged on is, ont 131 thrashing pi ions and view to a ton ours.
